MOKENA, ILLINOIS JULY 23, 1926.

\$1.50 PER YEAR IN ADVANCE

Mission Head Is Presented With Car

Peter McCarthy, Supt., of the Morning Star Mission in Joliet and widely known thruout Will County called at the News-Bulletin office recently and told of a wonderful gift he has received from the business people of Joliet, thru the instrumentality of Rev. Walter McPherson, Universalist church, Joliet by way of a new Chevrolet sedan. This gift was in recognition of his splendid uplift work and we surely congratulate Mr. McCarthy on his splendid gift. Now he can

cover his "territory" more quickly and do still greater work for his Lord. Mr. McCarthy has done more good to humanity during his mission work, than many churches have.

Following is his report for the month of June: Conversions, 42; free meals 105; free clothing to 57 persons; free bars soap 30; free new Testaments 13; free gospels 100; police court and jail visits 26; paid rail road fare for 5 persons; 3 boys age 16, one boy of 17 and one man 72 years old; spoke in Bloomington Home Sweet Home Mission and at Congregational church, Batavia, Ill.

Oak Lawn

News Notes

CONGREGATIONAL CHURCH

A group of Juniors in the Daily Vacation Bible School attended a conference at the Immanuel Church of Chicago last Monday afternoon. They took part in a program with several memory selections and a song.

Any Monday, Wednesday or Friday afternoon next week will still be open to a group of children to go to the Municipal Pier via Lake Michigan from the Jackson Park Pier. Let Mrs. Wilson or the pastor know and the only condition will be an escort. Several automobile loads of kiddies have already enjoyed this great vacation opportunity of going out on the Lake during this hot weather.

The Union Community Church of Beverly Hills visited Oak Lawn with their D.V.B.S. and a great time resulted, baseball and every thing. Now Oak Lawn boys and girls want to go to Beverly Hills church for a return game.

Any friends of the D.V.B.S. who care to drive their automobile on the 29th of July, will have company and a pass to the White Sox Ball Park. Report to Mrs. Wilson.

The Ladies Aid of the Church met at Miss Kennally, Thursday July 22nd. Bunco and cards were the fashion of the afternoon. A good time was had beside money was raised for the coffers of the church.

The committee under the charge of Mrs. Kellams has planned to sell Christmas cards and the committee of Mrs. Philip's will hold another bake sale.

Frederick Ingersoll has dropped one of the Daily V.B.S. because of vacation days now to be spent in Michigan.

The Lambright family left Saturday for their vacation.

Herbert Peterson and Glenn Elvidge have been sick with summer colds but are now able to be about. The Congregational Church has its doors open to all strangers, "Come and let us do you good and you can do us good." Rev Mr. E. A. Reese preaches every Sunday morning at 11 o'clock. "A River becomes crooked when it follows the lives of least resistance. So does a man."

Geo. Paser of the Oak Lawn Cleaning and Dyeing Shop, wishes to announce that he now has a Telephone, the number being 58-J. He calls for and delivers all work. Use the telephone as a time saver. Adv.

New Lenox Camp Meeting Opens Sun.

Institute week, conducted at the New Lenox camping grounds annually for members of Epworth leagues of the Joliet-Dixon district, which opens Sunday and continues to August 1, will be featured by several program this year, according to those in charge.

Miss Pauline Mayo, New York city, dramatic reader, will present Channing Pollock's "The Enemy", Sunday evening at 7:30 o'clock. Preceding this program, a cafeteria supper, and an Epworth league devotional session will be held.

The morning program will open at 10:30 o'clock, with the Rev. E. C. Lumsden, district superintendent preaching the sermon. The Rev. Glenn Bruner, Nagasaki, Japan, will speak at 2:30 o'clock, the entire day's program being open to all interested.

WILL PRESENT DRAMA

The Sunday program, concluding the Institute, on August 1, will be featured by a drama, "The Hour Glass," to be given by members of the Ottawa Street M.E. League, in the evening. Institute communion presided over by the Rev. W. C. Godden, dean, will be observed at the morning session, followed by a sermon by the pastor of St. Stephen's Methodist church of Chicago. In the afternoon H. H. Weak, a missionary on furlough will address the congregation, after which a cafeteria supper will be served, and an Epworth League devotional service will be held.

The daily schedule will be as follows: 6:15 o'clock, rising bell; 6:30 to 7:15 o'clock, morning watch, Dean W. C. Godden; 7:30 o'clock, breakfast, cafeteria; 8:30-9:10 o'clock, Bible E. C. Lumsden; 9:15-9:55 o'clock, stewardship, I. E. Putnam; foreign missions, Miss Mahaffie; home missions, A. W. Mohrns; 10:10-10:15 o'clock, recreational demonstration, E. A. Flory; 10:20-11 o'clock, evangelism, H. E. Rompel; public expression, Miss Mayo; Sunday school methods, Perry James; social service, Miss Mahaffie; 11:50-12:30 o'clock, general methods, Otto Nall.

Following the serving of dinner at 12:30 o'clock the afternoon's schedule is as follows: 1-2 o'clock, quiet hour; 2-5 o'clock, recreation; 6-7 o'clock, supper, cafeteria, and 7:30 o'clock, assembly.

The daily evening assemblies will feature the following activities: Monday, introduction of faculty; Tuesday, address by the Rev. A. W. Hamilton, former New Lenox pastor; Wednesday, address by the Rev. H. E. Rompel, Springfield; Thursday, address by the Rev. L. E. Fuller D. D., Garrett Biblical Institute; Friday, stunts, and Saturday, campfire and installation of officers elected during the week.

Dr. Lumsden to Speak at Mokena M. E. Sun. Eve

Dr. Ernest C. Lumsden, District Superintendent of the Joliet-Dixon District, will preach at the Mokena Methodist Church next Sunday evening, July 25th at 7:30 o'clock. Dr. Lumsden spoke last fall at a large gathering of church people and proved himself to be a very able preacher. Everyone in the community is invited to hear this sermon, which is sure to be as fine or better than his message of last fall. After the evening worship service, the last Quarterly Conference of the year will be held with the officers and members of the Methodist Church. All are invited to remain for this business meeting.

Balchowsky's Open Mon. Wed. and Saturday Nights

In order to accomodate the large number of people attending the big sale now on, the Balchowsky store at Frankfort will be open on Monday, Wednesday and Saturday nights.

Geo. Burnette and Gladys Haase have taken over the business of John E. Bushfield, known as Bushfield's Restaurant at 5402 W. 95th Street, creditors will please present claims at the office of John T. Emery, 5402 west 95th St, agent for both within thirty days of date. Adv.

Deputy Breaks Youth's Nose And Is Fired by Sheriff

Gilbert Knater, former deputy sheriff at Frankfort, has been "fired" by Sheriff John Walker of Will County.

A week ago Saturday, Elmer Stelter aged 19 years, of Chicago Heights, attended a dance at the Mokena pavilion. He is said to have become disorderly and when remonstrated with he became quarrelsome, whereupon Knater is charged to have struck him in the face, breaking his nose. His parents immediately preferred charges against Knater, who was called into the Sheriff's office last Monday and made to give up his deputy sheriff star and card to Sheriff Walker. Charges against Stelter were dropped when his case came up before Judge Schultz at Mokena Friday.

Oil Stoves Cause Fires at Mokena

The Mokena Fire Department was kept busy this week when two fires broke out. On Monday morning about 7 o'clock a summer kitchen in back of the residence occupied by Mrs. Florence Hamilton caught fire and was partly destroyed. Mrs. Hamilton had a wash boiler filled with water on a 4 burner oil stove heating for the family washing. She had just left the summer kitchen going into her residence to prepare the breakfast when she saw a blaze in the summer kitchen and hurried out to see what it was, and found the entire building a mass of flames. All her clothes she had in the kitchen ready to wash, burned as did also other contents. It is thought the fire was caused by the oil stove but just how is a mystery.

The fire siren got a big crowd together in a short time and the fire department managed to save the burning building altho it was badly damaged.

On Tuesday morning Wm. Lowe residing in the Marks cottage, got up about 10 minutes to 4 and lit a three burner oil stove on which a wash boiler full of water had been placed. He set the alarm clock to ring at 4:45 and went back to bed. He had only laid down about ten minutes when Mrs. Lowe noticed the bedroom getting pretty light and smelled smoke.

Mr. Lowe got up and went to the kitchen and was greatly surprised to find it a mass of flames. He called for help and his neighbor, J. H. Nordell quickly responded and helped him carry the household goods out in the street while Mrs. Lowe called for help on the telephone. The fire siren blew and brought in people from miles around. The fire department responded with both hose carts, but in turning a corner a wheel was broken off one cart, so only one lead of hose could be used. The fire had got a good start and it was with difficulty that the building was saved. Half of the structure however burned down. The loss on the building will run about \$3,000 on which there is only \$1,000 insurance.

Some of the household effects of the Lowe family burned as also did an auto standing close to the building. Their loss is covered by insurance. Mr. Lowe suffered a burn under his left eye while fighting the fire.

NOTICE

TO WHOM IT MAY CONCERN

For the past five weeks stories have been in circulation that we caught a Frankfort man stealing chickens on our farm and that we were paid \$30 hush money.

This is absolutely untrue. We did not have any chickens stolen nor were we paid any money to keep still. Parties circulating these stories are laying themselves liable to prove what they say as we will prosecute anyone who peddles these unfounded stories. Let a word to the wise be sufficient.

Signed: Arthur and Wm. Mark.

VISIT NEWS-BULLETIN

Fathers Gagherty of the Sag and Gorey of Orland were visitors at the News-Bulletin office Thursday afternoon.

W. H. Bechstein Sells Elevator

W. H. Bechstein who has been engaged in the grain, feed and coal business in Mokena for the past 24 years, sold out Thursday morning of this week to Fred and Albert Cappel who will take possession of the business on August 10th under the firm name of Cappel Bros.

Mr. Bechstein bought this business from John A. Hatch in 1902 and in 1905 sold it to Frank Liess and located in Seneca. Three years later he purchased the business back again from Mr. Liess and has run it himself for the last 18 years. Mr. Bechstein who is president of the Mokena State Bank, will retire from active business. He will keep up his bank affiliations only.

The many friends of Cappel Bros., wish them much success in their new business.

Old Sauk Trail Pageant To Be Staged at Richton

A wonderful pageant commemorating the opening of the newly electrified suburban service of the Illinois Central will be observed at Richton, one mile south of Matteson this coming Sunday. The celebration is to continue for a week. There will be real buffalo hunt participated in by real Indians following which the meat will be prepared and served to all who will be present at the celebration. The buffalos were imported from Canada especially for this event.

Hundreds Witness Demonstration of Tinley Fire Truck

Hundreds of people attended the Greater Tinley Park Day celebration at Tinley Park last Saturday night. The new fire truck was demonstrated and proved to be a wonder.

The apparatus threw a stream of water higher than the Bruggeman elevator. When the pump was connected with the mains it pumped 400 gallons of water per minute. A well 22 feet deep and filled with water was pumped dry in 4 minutes.

The dance held at Linden Garden following the street parade and demonstration of fire truck was very largely attended. Tinley Park is to be congratulated on its progressive spirit in establishing such a splendidly equipped fire department.

Fight the Fly and Mosquito Pest

The first mosquito bite of the season ought to remind the victim that stagnant water is standing around somewhere close by. Rain barrels, tin cans, unsealed cisterns, marly pools and similar water receptacles and places make ideal hatchingeries for this pesty insect. Besides being a disagreeable nuisance mosquitoes carry malaria especially in the southern part of Illinois. Mosquitoes never breed in running water nor in bone dry territory. They rarely travel far from the place of birth. Enforcing rigid prohibition against stagnant water in the neighborhood or adding a coat of oil to it will eliminate the bites.

House flies have arrived with their perennial transportation program for disease germs. They specialize as a common carrier of typhoid fever and diarrhea bacilli. They ply between the germ incubators and the dining room. What they lack in per capita horse power they make up in preponderance of numbers. Stable manure is the most prolific breeding place of the fly, a pair of which can become the ancestors of many million offspring in a single season.

From now until fall a baby with a milk bottle on an unscreened porch is likely to look like the center of a bee hive at a distance. To the careful observer there is no occasion for wonder if the little fellow has a hard season with his bowels after a few such experiences.

August is the month when infantile diarrhea is most prevalent and that is when flies are most abundant.

Rev. Wm. Gorey New Orland Priest

Rev. E. J. Zurlinden, S. J., pastor of St. Michael's church at Orland has been recalled and Rev. Wm. Gorey of St. Mary's Lake Forest has been sent as resident pastor.

A resident pastor means every religious advantage to the Catholic community. Each member of St. Michael's congregation feels that this advancement, in the status of their parish, has accrued only thru the perfect labor of a perfect pastor.

It would be absolutely impossible to describe the void his loss left in the hearts of his people. So well did he love and teach little St. Michael parish, that there is no question but that the work so perfectly started by him, will continue—that Rev. Gorey will have the 100 per cent cooperation of his entire flock. Thus will be shown the heartfelt gratitude of a simple country folk for pastor who saw all his work big, forced St. Michael's to progress, and gave to the parish its resident pastor.

Mokena Defeats Orland 4 to 1

The biggest ball game of the season was played at the Schiek diamond last Sunday when the Orland and Mokena teams contested for the honors, resulting however in the defeat of Orland with a score of 4 to 1. Over 400 people witnessed the game and the gate receipts went up to \$115. The game was a good clean one from start to finish. The box score was as follows:

Mokena	RHE
J. Gregory, 3b	0 0 0
B. Larson, ss	1 2 1
Flynn, 2b	0 1 0
Pennosky, 1b	1 2 0
F. Gregory, c	0 0 0
Lucas, cf	0 0 0
Cummings, lf	1 3 1
Weiss, rf	1 4 0
Jones, p	1 0 0

Orland	RHE
Koehler, cf	0 2 0
Thomas, 2b	0 1 0
Ludwig, lf	0 0 0
Seyferth, p	0 1 0
Connally ss	1 1 0
Walsh, c	0 0 0
Moore, 3b	0 2 0
Nicolai, rf	0 0 0
Kramer, 1b	0 0 0

2 base hits, Larson, Pennosky, Cummings, Weiss, Koehler; base on balls off Jones 2; off Seyferth 1; struck out Jones 2; Seyferth 6; hit by pitched ball by Greogry.

This Sunday Mokena plays Chicago Heights at Mokena. A fast team and good game assured.

Mokena Starting Fund To Buy Chemical Truck

Mokena has made another move in the right direction by way of starting a subscription list to create a fund for purchasing a chemical fire truck similar to the one in use at Frankfort and Tinley Park.

Elmer L. Cooper, local garage man and Ona E. McGovney, local insurance man, are back of the movement.

Elmer Sippel headed off the list Thursday with a \$100 subscription. Every one in town and surrounding territory should give liberally to ward this worthy cause as it means much to the citizens of this section to have good fire protection. Mokena has a good fire siren and with a new chemical fire truck, would be well equipped to fight any fire in or out of the village.

At present the only fire protection is as far as the water mains extend, and the fire hose reaches, but with a chemical outfit, any part of the village or country could be reached. Let us all boost for the chemical fire truck.

The Mokena Vol. Fire Department showed they can give efficient service when they were called to fight two fires this week.

Mokena Board Hires Teachers

The Mokena School board has engaged three teachers for the next term. They are: Mrs. Ford of Frankfort, Miss Thayer of Minooka and Mrs. Ferguson of Joliet, the latter having taught in this school the past term. The board feels they have selected as good teachers as are possible to get and that they will keep up the high standard of the Mokena Schooll.

HOLD FAMILY REUNION

The Haley families of Marley held a big gathering in the Storm's grove last Sunday. A very large number of guests attended.

MOVIE COMING

"The Sky Pilot" a famous movie of a famous story will be shown at St. John's church, Mokena Aug. 11

\$700 Taken In At Lutheran Picnic

The picnic held by the Immanuel Lutheran church of Mokena at the Cappel Grove Sunday was largely attended and over \$700 were taken in. The local orchestra made a hit with their music, Director Leon F. Tonn and the boys were complimented for their good music.

A week from Sunday Mokena and Orland play at Orland.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(C. 1226, Western Newspaper Union.)

HOW TOOTHBRUSHES ARE MADE

TOOTHBRUSHES are by no means a recent invention. Primitive peoples either in past centuries or in present-day remote regions, did not have bristle brushes as we have today, but they did keep their teeth clean. Strangely enough, the brushes used by early races are practically like those used today in the South seas and among Central African tribes. A piece of soft wood slightly larger than a lead pencil is either beaten or chewed, until it is soft and the long wood fibers are separated, forming a brush on the end of the stick. This is rubbed up and down, instead of across the teeth as our modern toothbrushes are used, so that the fibers go in between the teeth, polishing the teeth and also cleaning out particles of food which lodge in the spaces between the teeth. In Central America and South America, a piece of sugar cane is chewed until the cane is soft and the teeth are cleaned with this. In some other tropical countries, a small piece of bamboo is used.

There are several advantages about this stick toothbrush. One is that, after one has been used, it can be thrown away. Here the savage has an advantage over the civilized man who gets his toothbrush at a drug store or department store. He can have as many toothbrushes as he wants and he does not have to pay anything for them. A stick toothbrush is really more effective for cleaning teeth than our modern form, as dentists are finding out. They are now advising their patrons to brush their teeth up and down and special toothbrushes are being made for the purpose.

Modern toothbrushes, says the American Exporter, are made of animal bristles. These are usually hog bristles, the best grades of which come from the colder parts of Siberia and China, where wild hogs abound, which live out in the woods all the year round. Evidently, the colder the climate, the stronger, longer and stiffer bristles the hogs must have to protect them from the cold.

These hog bristles are shipped to this country arranged in "bunches," according to length. They are also sorted by color. Handles of toothbrushes used to be made entirely of bone. They are now made of a celluloid compound.

They are made in many sizes and shapes of handles, straight and curved, large and small. Many dentists have specially shaped brushes made for their patients. After all, any brush is good if it is used often, thoroughly and intelligently.

POTATO BUG POISON FOR MOSQUITOES

EVER since it was proven that malaria was carried solely by mosquitoes, every effort has been made to find an easy, cheap and sure way of killing mosquitoes. After the mosquitoes have hatched out, it is practically impossible to kill them. Mosquito nets and window and door screens will keep them out of houses and away from beds. But no screens are absolutely mosquito proof and screens and nets do not protect those who are out doors at night.

While the mosquito on the wing cannot be killed, the larva or "wigglers" can be killed while they are living in water or the breeding places can be destroyed by draining the pools or oiling the water. But both these methods are difficult and expensive.

Scientists have long been hunting for some kind of poison by which the mosquito larva can be killed easily and cheaply. In the last report of the Rockefeller Foundation, Dr. George E. Vincent, the president, announces that the United States public health service has found that ordinary paris green, used for years by farmers and gardeners to poison potato bugs, is just as effective in killing mosquitoes. This promises to be a more effective way of controlling malaria than anything heretofore tried.

Experience proves, says the report, that large groups of people will not take quinine long enough to get rid of malaria. As soon as the sick person feels better, he stops taking quinine. Several ways of controlling mosquitoes have been tried. Drainage on a large scale, ditching to drain small tracts, planting minnows in ponds, lakes and streams to eat up the larvae, spraying creosote or crude oil on the water to suffocate the wigglers are all good but expensive.

The public health service has found that a mixture of 99 parts of ordinary road dust and 1 part of paris green, sprinkled on the water, will kill the larva but do no harm to the fish or live stock. The government has tried scattering this powder over large areas from airplanes. It is not necessary to remove the vegetation from the water or to drain the area to be powdered. One pound of paris green will make 100 pounds of powder. The airplane flies low over the swampy region, slowly scattering the dust as it goes. The dust settles on the water and kills the wigglers.

Everyone expected wonderful results from flying machines. No one ever dreamed that they would be used to kill mosquitoes.

More or Less

Postmaster Solomon Seches of Memphis, discussing a mail swindle that had hit Tennessee hard, ended with the philosophic remark: "What America needs is more plow shares and less of the oil kind."

To Have a Clear, Sweet Skin

TWO WOMEN FOUND HELP

By Reading Experiences of Other Women

Mrs. Nina Matteson, Box 206, Oxford, N. Y., writes—"If it had not been for your medicine, I could not have done my work as it should have been done. Mother told me of Lydia E. Pinkham's Vegetable Compound, and I had read in different papers what it had done for different women. She wanted me to try it, so my husband got me one bottle at first; then I took two others. Now I am feeling quite strong again."

Mrs. Ernest Tanguy of Adams, Mass., says she was ill for four years and could not sleep nights or go out on the street. She read about the Vegetable Compound and decided to try it. After taking eight bottles she was able to do all her work and go anywhere and is quite herself again.

This dependable Vegetable Compound is a household word in thousands of homes. The fourth generation is now learning the merit of Lydia E. Pinkham's Vegetable Compound.

For more than half a century, this reliable medicine has been used by women with very satisfactory results. If the Vegetable Compound has helped other women, why shouldn't it help you?

"The yellow can with the black band"

Palos News Notes

BY EDITH BRADLEY WELLS

"THE EVOLUTION OF THE AMERICAN HOME"

Magazines and newspapers these days filled with articles about "Woman." She is lauded by some as the stronger sex—by others her inferiority is stated and explained. Just why all this interest should suddenly center about the sex—composing one half of the human race—which is as old as Eve, is a mute question. Along with this interest in woman-kind, has come an increased interest in what is still largely her field of activity—the Home.

"The Evolution of the American Home," a paper written by Mrs. Sigrid Lely was presented at the meeting of the Palos Woman's Club last Thursday at the home of Mrs. Thomas Quin. Mrs. Jeremiah Quin and Miss Margaret Cary were the hostesses.

The evolution of the American Home, says Mrs. Lely, can be divided into five distinct periods—the Indian, the Puritan, the Colonial, the 1860 and the Modern period.

The first American Home was the Home of the Indian, whose most typical shelter is the tepee. This consisted of long slim poles brought together at the top to form a cone—the poles being covered usually with the skins of wild animals. No Indian houses had no floors, save the bare earth, neither had they chimneys nor windows.

From the poles near the top hung clothing, weapons, and skins, as well as meat, corn and other foods. Soot from the fires made a thick dirty black covering for the walls and contents of the house. The smoke was as dense as to be unbearable to the white man and often caused blindness among Indians. They had no furniture except their beds which were pads of matting covered with bear skin.

The Indian women did all the hard work. The Indian children not being required to help with the work of the household nor were they punished by their parents except in extreme cases. Then they were punished by throwing 2 bowls of cold water over their heads.

Babies were usually born in a brush shelter back of the dwelling as it was considered ill luck to have them born in the house.

The laws, beliefs and folk tales of the Indian passed from one generation to another by spoken word.

Mrs. S. Y. Patterson, dressed in an Indian costume, sang for us, "The Indian Love Song", from "The Land of the Sky Blue Water."

THE PURITAN PERIOD

In 1620 the Mayflower brought to the cold inhospitable shores of New England, a little company of brave folks, whom we call Puritans. They landed in December, and as they were not prepared for the intense cold, miserable shelter and scant food, half of them passed away the first winter.

Of necessity their first thoughts on landing turned toward the construction of some sort of shelter. Small log cabins were built, consisting of just one room, with no windows, and at the end of the room, a large fire place. As the fire of pine knots furnished the only light in the house, the family gathered around it to perform its household duties; most of the food being prepared in a large iron kettle which hung in the fireplace.

The time and energy expended to produce just the bare necessities of life, left little for cultural efforts, what little was produced was of religious character.

As an illustration of their music we have York's "Doxology", which was played for the Club by Mrs. A. H. Schweizer; demure in the somber gray of the Puritan era.

In striking contrast to the Puritan days, the Colonial Period was the greatest era of American refinement and hospitality, the homes reflecting the spirit of the times by their spaciousness and stateliness. These houses were usually two stories high, of either wood or brick. Enormous fireplaces and beautiful period furniture, such as the Jacobean, Georgian, Chippendale and Adam, made the large living rooms a delight.

As the negroes did most of the work, the colonial woman had much leisure, and could therefore devote much of her time to books and to clothes. And the Colonial dress was fluffy, lacy and colorful.

Francis Hopkinson and Stephen Foster, both born in Colonial times were among the first American composers.

Dressed as Martha Washington, Mrs. E. Umber sang the old song, "When You and I were Young, Maggie."

The 1860 Period was one of stagnation, "Everything was Ugly." The red and green plush furniture

was very much in vogue in overdressed parlors. Large rose patterned carpets covered the floor, tidies, whatnots, shaving mugs and oil lamps were part of the decorations. These not only cluttered up the house, but made twice the work for the duster. The women were weighted down with yards of materials in their clothes which also added to their labors not only in sewing but in washing and ironing.

There was however, in this period a great development of Literature. Much of the music centered around the Civil War.

Mrs. Quick dressed in a gown patterned after Mrs. Lincoln's Inaugural costume sang, "We Are Tenting To Night On The Old Camp Ground," composed by Walter Kittredge. The composer of this song, after being rejected for army service because of physical unfitness composed this song as his donation to the cause.

The Modern American Home is the last word in efficiency. The women of today have all the comforts and conveniences made possible by the rapid application of inventions in home appliances, such as electric light, washers, vacuum, sewing machines and all sort of household machinery. She can turn on the radio and be entertained while her work is being done electrically. The dress of to-day is very simple and requires little time and material. These conveniences naturally give the woman of to-day more leisure and time for advancement in other fields. The women of to-day having taken a greater interest in the betterment of their communities and the state at large. The apartment life is characteristic of to-day.

The literature of to-day is much in evidence. We have magazines of every description, papers and books. The activity in music is shown by the numbers of Symphony orchestras, opera companies, choral societies and schools of music.

"The Rosary" by Ethelbert Nevin, was sung for us by Mrs. Clyde Schultz.

Until 1900 there was no genuine American music, but America is now developing a lore of Folk Music based on Jazz. Jazz is as American as baseball. It is restless, honest, obvious, energetic, vulgar, human, impulsive, a cross section of Yankee Human nature in the raw. Jazz music borrows its rhythmic beat from the jungles of Africa imported to America by negro slaves and preserved in plantation ditties, spirituals and barn dance songs.

Marie Kotrba, as a modern girl, sang for us, accompanying herself on a ukelele, "Drifting and Dreaming" and a waltz song.

The question that occurs to all is: What will be next? Will it be a reflection of the best that has gone before or will it be an extreme departure from these five periods?

PALOS NEWS NOTES

I beg your pardon! In the description of the Independence Day celebration held in Palos Park, it was erroneously stated that "County and Village officials brought up the rear of the procession". This should have read "Township and Village officials".

Three Palos Park young folks celebrated their birthdays July eighteenth: Bernard Schofield, Ambrose O'Connor and Dorothy Wells.

The Athletic Club of Palos wants a tennis court and wants it badly. There are plenty of willing hands to do the digging, grading, etc. What they need now is a truck in which they may haul stone for the court.

Mrs. A. H. Schweizer entertained on Wednesday, the twenty-first in the grove south of her home, the Chicago League of Women Voters. A talk on the subject of "Birds" was given in the afternoon.

Thursday, July 15th marked the fifty-fifth wedding anniversary of Mr. and Mrs. Oscar Reese. We all wish this congenial couple many more years of happiness.

Henry Briggs, Jr., has been home from work for a week because of an infected thumb.

Mr. Flynn reports that his new cement swimming pool is finished. How we do envy Mr. Flynn these hot July days!

Miss Hazeltine, an instructor in the Art Institute and the University of Chicago, and the winner of the Lorado Taft travel scholarship for this year, has accepted Mrs. Patterson's invitation to give a talk on the subject "Appreciation of Sculpturing" to the Women's Club.

This lecture will probably be given the first Monday afternoon in August at the home of Mrs. Geo. B. Ward.

EXPOSES WILES OF FAKE STOCK SALESMEN AND PROMOTERS

Latest Methods of Confidence Men Described by American Bankers Association Official—Declares That Shrewder Schemes Than Ever Before Are Taking Peoples' Savings.

By W. R. MOREHOUSE,
Public Relations Commission, American Bankers Association.

ARTICLE NO. 1

MUCH of the distress of many people in America today is due, not to the fact that they have not had an opportunity to earn and save money, but to the fact that they have lost their savings in fraudulent schemes of one kind or another. Many a widow is in financial difficulty not because she was left penniless by her husband but because she lost her inheritance by investing it in "gold bricks." Many a bank depositor who once carried a fine balance is penniless today not because he did not know how to save but because he did not know how to invest.

Perhaps if I relate some wild-cat promotions that give an insight into the activities of investment sharks it will quicken a relentless determination to provide depositors with much needed advice in investment matters. I have come in personal contact with many cases, some of them almost unbelievable because of the very crookedness of the schemes led to invest their savings in these promotions. In giving the high

W. R. Morehouse

lights of certain cases I am not drawing on my imagination in the least, nor am I relying on hearsay, but giving first-hand information.

Unbelievable but True

Many millions of dollars have been lost in oil. The sum is staggering. Into over corner of the United States the mails carry high-powered sales talk of great riches to be made in oil. Carried away by these promises, depositors quietly withdraw funds from their banks and send them on to wild-cat speculators. Not one out of a hundred has ever recovered the money he invested. Still wild-cat promotions continue to flourish, with a new crop of victims coming up to take the place of those who are forced out of the

excitedly back to the derrick, wrench in hand.

"We have drilled to the 'Bell' sand!" the lecturer shouts, bringing cheers from every high-pressure salesman, followed by a chorus of voices from the surprised audience. "We can bring in a 5,000 barrel well if we care to, but if we the 'Meyer' get a 12,000 well!" he adds. "Go on deeper! Go

From American Bankers Association Journal

The Fake Oil Stock Sale Was Opened With Prayer

running because they have already lost their savings.

Listen to this one! It is a typical case. A tract of land, just ordinary land, nothing about it to indicate there is oil beneath the surface. An oil rig, a few tools, half a dozen strings of pipe are close at hand. A large show tent filled with chairs that will seat several hundred people. It is 10 a. m. The sun is shining brightly, and it is a glorious day.

Presently several large busses draw up loaded with people ranging in age from fifty years to eighty. A corps of high-pressure salesmen rush out to greet the arrivals and to assure them that they are most welcome to what will be the next great oil city of America. The aged and feeble minded are tenderly conducted to comfortable chairs under the big tent. In plain view of those seated as they peer out through the flap of the tent stands majestically the oil rig spattered with crude oil and nearby is the big oil sump also filled with oil. Through an ingenious circulating system oil from the sump flows into the well and back into the sump through a pipe in full view.

Religious Revival Methods

Presently the official lecturer calls the meeting to order. The impression he creates is that he is either a minister or has studied for the ministry. He opens the meeting with prayer for the success of the venture in oil. After prayer this sanctimonious gentleman tells how he has invested all of his own earnings and all of his children's savings in the venture, so confident is he that it is to be an oil gusher and all are to be made rich.

He charms his audience with his oratory. He impresses them with his honesty. He calls their attention to oil in plain view, intimating that it is from the well. And while he is painting before them, figuratively speaking, luxury and old age comforts if they invest in the "A-A" Oil Company, the foreman of the rig rushes in, his clothes spattered with crude oil. He is excited and almost out of breath as he reaches the sanctimonious lecturer. A few words are whispered. The lecturer's face registers great delight at the news. He turns back to his audience, a smile of victory on his face. The foreman rushes

on down!" shout the salesmen almost in unison, followed by cheers from the listeners.

The zero hour is at hand. The time has come for the high-pressure artists to sign up the listeners for units. The salesmen "hit while the iron is hot." Nearly every listener is signed up. The few who hesitate are forgotten only momentarily for the tables are brought in and the big free lunch made ready. As all sit down at least one salesman is at every table. The work cut out for him is to sign up the few who escaped the first "pulling of the net," and you may take my word for it few escape.

One by one these old people, under the spell of being rushed into the deal, pay over their cash, sign notes or turn over good securities for units in the "A-A" Oil Company.

This picture of an oil speculation may seem too crooked to be true, but it is a real story of how thousands of savings depositors, all past the age of fifty, lost over half a million dollars. This story is one of many hundreds that might be told, all of which have ended disastrously for millions of investors.

(Article II will reveal further fraudulent schemes for robbing workers of their savings.)

Truth and Advertising Have Made America Great

Truth in news columns and advertising is the foundation of America's prosperity, Melvin A. Traylor, Second Vice President American Bankers Association, recently said, adding:

"Continuance of our prosperity rests chiefly upon continuation of the greatest of all causes for our present good times—truth in news columns, truth over the store counters and truth in advertising. World-wide acceptance of great discoveries and inventions has been due to the fact that the newspapers truthfully described them and the manufacturers truthfully advertised them. If deceit had been the general rule, if the motto had been 'sell quick and let the buyer beware,' the public would have turned against the new things. I recall one particularly large firm which three years ago began advertising its wares falsely; it is today hopelessly bankrupt.

"Wise advertising costs nothing. You have only to increase the sale of your products to the point that covers the advertising charge to enjoy the enlarged business without cost. The natural saving in overhead is extra profit for dividends or for further expansion."

FROM PALETTE TO MORTAR BOARD

Young women artists turn from their jars of color and paint brushes to assist plasterers in setting ornaments in place atop huge pylons which adorn the main entrances to the Palace of Agriculture and Food Products, of the vast exhibition buildings which forms a part of the great Sesqui-Centennial International Exposition being staged in Philadelphia from June 1 to December 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence. Climbing ladders and walking along rickety scaffolds is nothing new to these young ladies, but each time they do it they get a thrill.

MOKENA

MOKENA FOLKS DINE WITH
"UNCLE BOB."

The following guests were entertained at dinner Sunday at the home of Mr. and Mrs. Wm. Nill, Fire Chief of Hammond, Ind: Mr. and Mrs. Walter Schoeneck, the former known as "Uncle Bob" of K. Y. W., Mr. and Mrs. Geo. Thon, Miss Helen Thon, Anna and Theo. Radle of Hammond, Mr. and Mrs. Henry Schoeneck, Mr. and Mrs. Ervin Warning and sons Keneth and Fremont of Mokena, Miss Florence Schweser of Joliet and Mr. Matt Cserep of Gresham. Later in the evening they were all entertained in the Hammond Theatre where "Uncle Bob" played.

Miss Clara Roesner and Mr. Paul Roesner are enjoying a two weeks vacation.

Last Thursday evening a surprise party was given in honor of Mrs. Edward Werner, the occasion being her birthday. A large number of friends and relatives were present. A good time was had playing bunco and later refreshments were served.

Funeral services of the late Fred Mau were held Saturday afternoon at 1:30 P.M. from the late home to St. John Evangelical church, Rev. W. J. Cramer officiating. Burial in St. John cemetery.

A clever surprise party was sprung upon Mr. Oscar Klose Sr., Saturday night, planned by Mrs. Klose in honor of the former's birthday. A large number of friends were present. Games were played and at a later hour refreshments were served.

Miss Mary Weiler of Orland was a guest Sunday at the B. Hostert home.

Mrs. Howard Gorham and son Bobby of St. Petersburg, Fla., arrived Sunday to spend several weeks with her mother, Mrs. K. Cooper.

Mr. and Mrs. Elmer Cooper and daughter Florence motored to Bloomington, Saturday and visited over Sunday at the home of Miss Nellie Holt.

A number of Mokena people attended the big Tinley Park Day celebration there last Saturday evening.

Despite the hot weather, services were held at the M. E. Church Sunday evening. Altho the number was small a very interesting address was given by the Rev. Mr. Beaty on the various traits of human nature.

Mr. and Mrs. Floyd Healy returned from their vacation spent at Byron, Ill., and other places. They expect to move back to Byron the last of the month where Mr. Healy has accepted a position in the bottling plant of McCormick's.

Mr. and Mrs. Harrison Haley of Kempton, Ill., spent Saturday with the latter's parents, Mr. and Mrs. Nicholas Lauffer and attended the Haley Family reunion at Marley Sunday.

Mr. W. N. Lathrop has accepted a position in Chicago with Sear's-Roebuck & Co., in the Drafting department.

Rev. Kemnitz and family, formerly of Mokena, now of Chicago, attended the Lutheran picnic here Sunday.

Mrs. Albert Hodell is very ill at home.

Mr. and Mrs. Hugh Deadmore of Joliet visited at the Wm. Semmler home Saturday.

Rev. W. J. Cramer and family left early Tuesday morning on a vacation to be spent in southern Indiana and Illinois. They will motor all the way. They expect to be gone for 2 weeks. No services held at the St. John Evangelical church during the pastor's absence.

CARD OF THANKS

We wish to thank everybody for their sympathy shown by their kind words and deeds during our recent bereavement.

Mr. and Mrs. Emil C. Mau

Mrs. Rose Moriarty and children are spending a vacation in Buffalo, N. Y. and other eastern points.

David Brooks, foster son of Mr. and Mrs. Albert Hellmuth, who has been in the Lutheran Sanitarium in Wheat Ridge, Colo., for the past 3 years, is not as well as he has been.

Mrs. Emilie Hanson's sister from Texas, arrived Thursday to spend a few weeks with her.

Mr. and Mrs. Chas. Duke and Mr. and Mrs. R. Burlingame and family of Englewood spent the week end at the home of Mr. and Mrs. Jay Butler.

The R. N. A. Juveniles were entertained last Friday at the home of Mrs. Mary Marti. Games were enjoyed and refreshments served. Everyone had a very pleasant time.

The Missionary Volunteers and their parents of Joliet, spent Sunday afternoon and evening at the

home of Mr. and Mrs. J. Butler. All enjoyed the various games which were played in the afternoon and at 6:30 a picnic supper was served on the lawn to a happy group of 54.

MOKENA M. E. CHURCH NOTES

Glen T. Beaty, Pastor.

Are you keeping RELIGIOUSLY COOL during the hot weather? Our Sunday School is at 10:30 A. M., and our Worship Service at 7:30 P. M. We are trying to have services worth the effort of braving the heat. However, our church is very comfortable these evenings and we are striving to make our services short enough to please all. Next Sunday Dr. Lumsden will preach for us. There are other hot weather treats coming!

All officials of the church are urged to be on hand for our Quarterly Conference, the last of the year, after the preaching service Sunday, July 25th.

Mr. and Mrs. Herman Scheer who have been visiting in California and Texas, arrived here Wednesday morning and are now visiting at the home of Mrs. August Hanson.

CARD OF THANKS

We wish to thank the Mokena Volunteer Fire Department and all others who helped us fight the fire at our home Tuesday morning.

Mr. and Mrs. Wm. Lowe

OAK LAWN

Judge and Mrs. Frank O'Brien motored to Chambersburg, Ill., last week to visit with Mr. and Mrs. F. P. Bushfield, formerly of Oak Lawn. Mr. and Mrs. Geo. F. Mann are enjoying a motor trip to Niagara Falls and other points.

Miss Van Dungen of Grand Rapids, Mich., has been the guest of Misses Johanna and Christine Smilde.

Rev. Paul Brockhaus, pastor of Oak Lawn Lutheran church for 20 years has accepted a call to a Lutheran church in Lincoln, Ill. Rev. Brockhaus has been faithful in his work here and it is with regret the community is to have he and his family leave.

Mrs. Brockhaus and sons, Paul and Chas. are visiting with relatives in Wisconsin.

Mr. Wm. O'Brien has moved in the apartment over the garage on 54th St., owned by Harry C. Phillips.

Mrs. Francis McRoberts of Chicago who owns the National Beauty shop at 69th and Halsted and who is well known to Oak Lawn people thru her frequent visits at the Leo Stevens home, has under gone an operation and slowly improving.

Mr. Kral and son Richard are to be thanked for clearing the islands and shores of the Oak Lawn Lake. By so doing they have helped to overcome the mosquito nuisance and also makes a pleasant sight.

Mayor and Mrs. John Emery and daughter Berenice, Mr. Khuan and son Kenneth, Mr. Fred Bartley of Monticello and Mr. Wm. Malone of Tampa, Fla. attended the Elks picnic in Mokena last Sunday.

The Oak Lawn roads are being repaired.

Mrs. Al. Smutney entertained at a shower at her home on July 15th in honor of Miss Evelyn Winther and her approaching marriage in September to Mr. Chester Neiman of Chicago. A good time was had and the honored guest received many beautiful gifts. Refreshments were served.

The German Lutheran church held their annual picnic in Brandt's Wood on July 11th. A good time was enjoyed.

THE OAK LAWN GOSSIP CLUB

"Out on the front porch,
On Monday morn, the rain
Was pouring down. The people
Did step in from all parts of the town.

They started on a little chat,
And wondered the reason why,
The people
Could not tend their own business,
And let good things go by.

One lady said 'we will start a Club.'
The other said, 'what will it be?'
The other said, 'the Gossip Club
Is good enough for me.'

—John Parrot

WORTH

Our church in Worth is being painted and increases the already pretty village. This should stimulate others to do likewise and make our streets more beautiful.

The contractors, both on the four miles north and south on Harlem Avenue are rushing the work and

with the progress so far made, it looks promising that the cement road from 79th to 143rd street will be completed before snow flies.

Sunday, July 18th was the banner day for heavy traffic on 111th street. This popular highway was crowded from 5 a. m. until after midnight.

Mrs. D. Perry is on the sick list and is with her niece in Oak Park.

Mr. C. C. Tobey has contracted to sell 30 acres of his farm joining Harlem Avenue at \$1700 per acre.

Mr. C. G. Rust has sold his property on Harlem Avenue for \$20,000.00, which is a little over \$4000 per acre. Henry Leipstroff has sold 2 1/2 acres for \$12,000.00.

With prospects of Harlem being a hard road within 3 months and of Columbus Avenue being thru within one year, gives Worth 3 hard roads.

Rumor has it that powerful interest have secured control of the Wabash railway and that we may expect Wabash suburban service to equal or excel I. C. and Northwestern service.

This is the result of activity in real estate values in this and southwest territory.

It is expected that a spur will lead direct to the 7000 acres of the forest preserve 2 1/2 miles west of Worth.

FRANKFORT

Rev. G. S. Gerhold was installed as pastor of the St. Peter Evangelical church at the morning services Rev. Erion of Elmhurst being the officiating pastor, who preached a splendid sermon in the German language. After this address Rev. Gerhold spoke in English. The choir rendered a number of fine selections. At 5 o'clock a reception and supper was held in the church basement. At the close of the supper a program was given by the Chior, Ladies Aid and Sunday school, Rev. B. F. Duncan, pastor of the M. E. church delivered the opening prayer and Rev. Gerhold gave the address of the evening. All services were very well attended.

Next Sunday July 25th will be held the annual picnic of St. Peter Evangelical church and Sunday school in Borman grove. A ball game between Mokena and Frankfort will be a feature. There will be games and races etc.

The Home Improvement Clubs of Will County held their annual picnic at New Lenox last Tuesday and a good delegation of Frankfort women attended.

Mr. Jake Feil, who has been very ill is able to be around again.

Merle Genenes, daughter of Mr. and Mrs. Chas. Genens, underwent on operation at Silver Cross hospital last Tuesday, has returned to her home.

Mrs. Christ Fink entertained the Pinochle Club at her home July 22. Raymond Warning motored to Chas. City, Iowa recently.

Mrs. Minnie Dammann who has been ill with dropsy for some time is not improving as well as her friends would like to see.

Mrs. Homer Smith and son Harold, Mrs. Wm. Jarchow and son Robert of Joliet returned home from Cedar Rapids, Iowa last Friday.

The Rev. Mr. Gerhold and family moved to Frankfort from Campaign last Wednesday.

The mason work on the new St. Peter parsonage is started and it is expected to have it all completed by November.

Mr. Levi Doty celebrated his 89th birthday on July 21st. We all wish him many more birthdays.

Mr. and Mrs. Arthur Ebert and family of Blue Island spent Sunday at the Wm. Genens' home.

Next Sunday is the big day at Richton, Indians and Buffalos will be present. The celebration will be from July 25th to Aug. 1st. Some time during these days the Ashler Band will play.

Mr. and Mrs. Jake Mager and family of Blue Island spent a few days at the home of Mrs. Mager's parents, Mr. and Mrs. Ferdinand Bobzin.

Vera and Lenora Haake will leave Saturday to spend their vacation in Indiana.

Lois Jarchow of Joliet was a guest of her cousin, Merle Deist in Green Garden.

Miss Elsie Bauch is camping near the Kankakee river.

The local Woodmen held a meeting at Frankfort hall Tuesday evening to make arrangements to attend the big Kankakee-Will County picnic on August 4th on the Island at Wilmington.

Breidert Bros. are remodeling the home of Edward Maue north of Mokena.

ORLAND

ORLAND M. E. CHURCH

Elmer Satterlund, Pastor

The Friday night picture this week, July 23, is the screen version of the stage play by the celebrated English playwright, Israel Zangwill, entitled "We Moderns."

On Sunday morning Bible school at 9:30. The attendance is very good despite the hot weather.

The many friends of a former pastor, the Rev. Mr. C. G. Brown, who was pastor of the church for three years, will be glad to learn that he will preach in our pulpit next Sunday morning, July 25th at the regular service time. Mr. Brown is now pastor of the First M. E. Church of Salem, Indiana.

Next Sunday evening the young people will have another evening discussion meeting. The leader is a specialist from Chicago. Also special music.

Last Sunday evening the closing exercises of the Daily Vacation Bible School was held at the church. There was a large number of friends present. A program in charge of the teachers: Miss Clara Myerick, Misses Clarice and Ethelin Mahaffay was rendered and enjoyed by all. Following the program the pastor of the church presented letters of appreciation to the teachers as well as a purse of money to each teacher expressing the appreciation of their work. The Women's Guild and Mr. Wm. Beagley deserve special mention in making this financial remembrance possible. Following the Bible School program the Rev. Dr. Jewell, Secretary of the Baptist Religious Educational Council of Chicago, spoke appropriately and also conducted a lively discussion as to the meaning of the Christian life.

Mr. Robert Murdock, who recently transferred into the church from Chicago has registered as a student at the University of Illinois and expects to leave for the State University in September. At the present Mr. Murdock is engaged in doing some special survey work for Mr. Clarence Beagley, the Orland Electrical Contractor.

Mr. Joseph Creer has recovered sufficiently from his injuries to be back at church again.

Mr. Will Nill, Fire Chief of Hammond, Ind., Mrs. Nill, Theo. and Anna Raddle, Mr. and Mrs. Alvin Marti and children of Frankfort Mr. and Mrs. Henry Kimmel and children visited at the John Helenhouse home Thursday evening.

Mr. and Mrs. John Helenhouse and son Harold, returned Tuesday from a few days visit in Granite City, Ill., and St. Louis, Mo.

BAREE, Son of Kazan

By JAMES OLIVER CURWOOD

(© Doubleday, Page & Co.)

WAKAYOO

Synopsis.—Part wolf, part dog—when two months old Baree has his first meeting with an enemy, Papaychew (young owl). Fighting hard, the antagonists are suddenly plunged into a swollen creek. Badly buffeted, and half drowned, Baree is finally flung on the bank, but the water has destroyed his sense of direction and he is lost, lonely and hungry. For many days his life is one of fear and distress. He meets various creatures of the wild and goes through a thunderstorm. He is learning more and more. He strays into the trapping grounds of Pierrot and Nepee. Nepee wounds Baree with a rifle, but he escapes. Baree recovers and learns nature's secrets rapidly.

Chapter IV

For two or three days Baree's excursions after food took him farther away from the pond. But each afternoon he returned to it—until the third day, when he discovered a new creek, and Wakayoo. The creek was fully two miles back in the forest. It sang merrily over a gravelly bed and between chasm walls of split rock. It formed deep pools and foaming eddies, and where Baree first struck it, the air trembled with the distant thunder of a waterfall. It was much pleasanter than the dark and silent beaver stream. It seemed possessed of life, and the rush and tumult of it—the song and thunder of the water—gave to Baree entirely new sensations. He made his way along it slowly and cautiously, and it was because of this slowness and caution that he came suddenly and unobserved upon Wakayoo, the big black bear, hard at work fishing.

Wakayoo stood knee-deep in a pool that had formed behind a sand bar, and he was having tremendously good luck. Even as Baree shrunk back, his eyes popping at sight of this monster he had seen but once before, in the gloom of night, one of Wakayoo's big paws sent a great splash of water high in the air, and a fish landed on the pebbly shore. A little while before the suckers had run up the creek in thousands to spawn, and the rapid lowering of the water had caught many of them in these prison pools. Wakayoo's fat, sleek body was evidence of the prosperity this circumstance had brought him. Although it was a little past the "prime" season for bearskins, Wakayoo's coat was splendidly thick and black.

For a quarter of an hour Baree watched him while he knocked fish out of the pool. When at last he stopped there were twenty or thirty fish among the stones, some of them dead and others still flopping. From where he lay flattened out between two rocks, Baree could hear the crunching of flesh and bone as the bear devoured his dinner. It sounded good, and the fresh smell of fish filled him with a craving that had never been roused by crawfish or even partridge.

In spite of his fat and his size, Wakayoo was not a glutton, and after he had eaten his fourth fish he pawed all the others together in a pile, partly covered them by raking up sand and stones with his long claws, and finished his work of caching by breaking down a small balsam sapling so that the fish were entirely concealed. Then he lumbered slowly away in the direction of the rumbling waterfall.

Twenty seconds after the last of Wakayoo had disappeared in a turn of the creek, Baree was under the broken balsam. He dragged out a fish that was still alive. He ate the whole of it, and it was delicious.

Baree now found that Wakayoo had solved the food problem for him, and this day he did not return to the beaver pond, nor the next. The big bear was incessantly fishing up and down the creek, and day after day Baree continued his feasts.

For a week life was exceedingly pleasant. And then came the break—the change that was destined to mean as much for Baree as that other day, long ago, had meant for Kazan, his father, when he killed the man-brute in the edge of the wilderness.

This change came on the day when, in trotting around a great rock near the waterfall, Baree found himself face to face with Pierrot the hunter and Nepee, the star-eyed girl who had shot him in the edge of the clearing.

It was Nepee whom he saw first. If it had been Pierrot, he would have turned back quickly. But again the blood of his forebear was rousing strange tremblings within him. Was it like this that the first woman had looked to Kazan?

Baree stood still. Nepee was not more than twenty feet from him. She sat on a rock, full in the early morning sun, and was brushing out her wonderful hair. Her lips parted. Her eyes shone in an instant like stars. One hand remained poised, weighted with the jet tresses. She recognized him. She saw the white star on his breast and the white tip on his ear, and under her breath she whispered, "Uchi moosis!"—"The dog-pup!" It was the

wild dog she had shot—and thought had died!

The evening before Pierrot and Nepee had built a shelter of balsams behind the big rock, and on a small white plot of sand Pierrot was kneeling over a fire preparing breakfast while the Willow arranged her hair. He raised his head to speak to her, and saw Baree. In that instant the spell was broken. Baree saw the man-beast as he rose to his feet. Like a shot he was gone.

Scarcely swifter was he than Nepee.

"Depechez vous, mon pere!" she cried. "It is the dog-pup! Quick—"

In the floating cloud of her hair she sped after Baree like the wind. Pierrot followed, and in going he caught up his rifle. It was difficult for him to catch up with the Willow. She was like a wild spirit, her little moccasined feet scarcely touching the sand as she ran up the long bar. It was wonderful to see the lithe swiftness of her, and that wonderful hair streaming out in the sun. Even now, in this moment's excitement, it made Pierrot think of

Full in His Path Stood Wakayoo—the Huge Black Bear.

McTaggart, the Hudson Bay company's factor over at Lac Bain, and what he had said yesterday. Half the night Pierrot had lain awake, gritting his teeth at thought of it; and this morning, before Baree ran upon them, he had looked at Nepee more closely than ever before in his life. She was beautiful. She was lovelier even than Wyola, her princess mother, who was dead. That hair—which made men stare as if they could not believe! Those eyes—like pools filled with wonderful starlight! Her slowness, that was like a flower! And McTaggart had said—

Floating back to him there came an excited cry.

"Hurry, Nootawe! He has turned into the blind canyon. He cannot escape us now."

She was panting when he came up to her. The French blood in her cheeks and lips. Her white teeth gleamed like milk.

"In there!" And she pointed.

They went in.

Ahead of them Baree was running for his life. He sensed instinctively the fact that these wonderful two-legged beings he had looked upon were all-powerful. And they were after him! He could hear them. Nepee was following almost as swiftly as he could run. Suddenly he turned into a cleft between two great rocks. Twenty feet in, his way was barred, and he ran back. When he darted out, straight up the canyon, Nepee was not a dozen yards behind him, and he saw Pierrot almost at her side. The Willow gave a cry.

"Mana—mana—there he is!"

She caught her breath, and darted into a cove of young balsams where Baree had disappeared. Like a great entangling web her loose hair impeded her in the brush, and with an encour-

aging cry to Pierrot she stopped to gather it over her shoulder as he ran past her. She lost only a moment or two, and was after him. Fifty yards ahead of her Pierrot gave a warning shout. Baree had turned. Almost in the same breath he was tearing over his back trail, directly toward the Willow. He did not see her in time to stop or swerve aside, and Nepee flung herself down in his path. For an instant or two they were together. Baree felt the smother of her hair, and the clutch of her hands. Then he squirmed away and darted again toward the blind end of the canyon.

Nepee sprang to her feet. She was panting—and laughing. Pierrot came back wildly, and the Willow pointed beyond him.

"I had him—and he didn't bite!" she said, breathing swiftly. She still pointed to the end of the canyon, and she said again: "I had him—and he didn't bite me, Nootawe!"

That was the wonder of it. She had been reckless—and Baree had not bitten her! It was then, with her eyes shining at Pierrot, and the smile fading slowly from her lips, that she spoke softly the word "Baree," which in her tongue meant "the wild dog"—a little brother of the wolf.

"Come," cried Pierrot, "or we will lose him!"

Pierrot was confident. The canyon had narrowed. Baree could not get past them unseen. Three minutes later Baree came to the blind end of the canyon—a wall of rock that rose straight up like the curve of a dish. Feasting on fish and long hours of sleep had fattened him, and he was half winded as he sought vainly for an exit. He was at the far end of the dishlike curve of rock, without a bush or a clump of grass to hide him, when Pierrot and Nepee saw him again. Nepee made straight toward him. Pierrot, foreseeing what Baree would do, hurried to the left, at right angles to the end of the canyon.

In and out among the rocks Baree sought swiftly for a way of escape. In a moment more he had come to the "box," or cup of the canyon. This was a break in the wall, fifty or sixty feet wide, which opened into a natural prison about an acre in extent. It was a beautiful spot. On all sides but that leading into the coulee it was shut in by walls of rock. At the far end a waterfall broke down in a series of rippling cascades. The grass was thick underfoot and strewn with flowers. In this trap Pierrot had got more than one fine haunch of venison. From it there was no escape, except in the face of his rifle. He called to Nepee as he saw Baree entering it, and together they climbed the slope.

Baree had almost reached the edge of the little prison meadow when suddenly he stopped himself so quickly that he fell back on his haunches, and his heart jumped up into his throat.

Full in his path stood Wakayoo, the huge black bear!

For perhaps a half-minute Baree hesitated between the two perils. He heard the voices of Nepee and Pierrot. He caught the rattle of stones under their feet. And he was filled with a great dread. Then he looked at Wakayoo. The big bear had not moved an inch. He, too, was listening. But to him there was a thing more disturbing than the sounds he heard. It was the scent which he caught in the air—the man-scent.

Baree, watching him, saw his head swing slowly even as the footsteps of Nepee and Pierrot became more and more distinct. It was the first time Baree had ever stood face to face with the big bear. He had watched him fish; he had fattened on Wakayoo's prowess; he had held him in splendid awe. Now there was something about the bear that took away his fear and gave him in its place a new and thrilling confidence. Wakayoo, big and powerful as he was, would not run from the two-legged creatures who pursued him! If Baree could only get past Wakayoo he was safe!

Baree has lots of trouble without the aid of his parents. What next?

(TO BE CONTINUED.)

Cold Welcome Given to Cargo of Bananas

John S. Mackintosh, who died in Washington recently, was for almost fifty years an exporter in Boston, operating a line of clipper ships. With every ship came some curiosity. One day a ship returned from Central America, and the master showed Mackintosh an elongated yellow fruit that grew in clusters.

Mackintosh regarded it warily; the ship was half-full of such cargo, and his Scotch prudence was aroused. Even after he had eaten one and pronounced it delicious, he was not certain they could be sold.

"What do you call them?" he inquired of the skipper.

"The natives call them bananas," the sailor answered.

Mackintosh put them up for sale, and a few curiosity seekers bought a bunch or so. He harangued their quality and tried to impress upon the Bostonians the deliciousness of the fruit. But his venture failed.

Caves of Elephanta

Not far from Bombay, India, are the famous caves of Elephanta. Elephanta is an island long held as a sacred place by Orientals. The name was given by the Portuguese from a colossal sculpture of an elephant. A series of subterranean temples are hewn right out of the solid rock. Columns of the natural rock are left standing to support the roof, says the Cleveland Plain Dealer.

WIDE BRIMS NOW IN FAVOR; DAINY FROCKS FOR TOTS

WHERE and how far are you going, my pretty maid, in this matter of wider brimmed hats? That is the question that is keeping designers of millinery awake nights. The pretty maid may not know just where she is going, but she is on her way toward the revival of elegance in millinery, and it looks as if she were beginning to revel in wide brims. There is no telling the duration of these revels, when the feminine mind wakes up to find itself intrigued by long earrings—

and has maidenhair fern and small roses silhouetted against the crown and brim. Fashion has thrown big hats into the ring of style and there is no disputing their beauty and elegance.

Since the little tots must "pretty up" occasionally in party clothes, mothers are always haunting the shops in search of dainty frocks for special occasions. They do not expect anything startlingly new in design or unfamiliar in fabrics, but they are pleased by

Wide Brims and Flowers the Latest.

wide-brimmed hats, bobbed hair or what not. Some French modistes are already predicting the wide brim for fall and winter. In the meantime milliners are encouraging the pretty maid to go as far as she likes in the matter of brims—they, too, are reveling in the revival of picturesque styles.

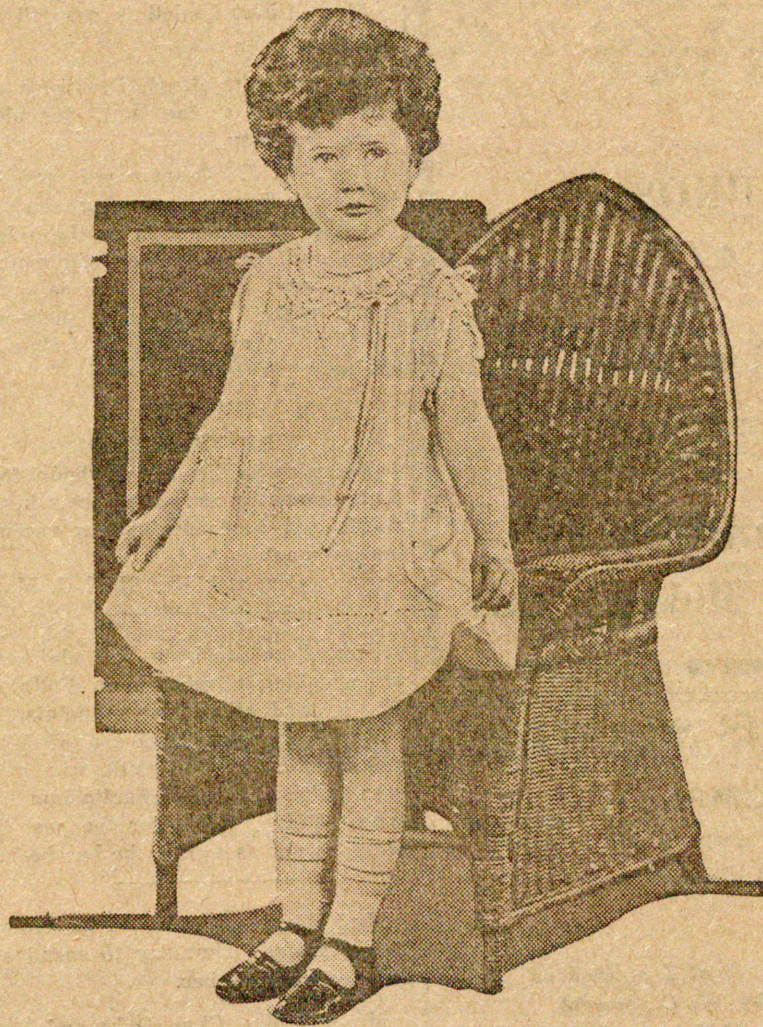

The group of midsummer hats shown here begins with the big and airy cartwheel sailor with brim of even width all around. It is a hair-braid shape bound with ribbon and has a collar of narrow ribbon ending in a little bow and short ends at the right side. Many trimmings this season keep entirely to the right, but this sailor supports a large chou at the left—made of organdie, or equally delicate fabric, that looks light enough to float away like a small cloud. These hair-braid hats are displayed in white and pastel colors and are immensely becoming, a choice of the right color will do wonders for the complexion.

By way of varying the wide brim, the hat below at the right has an odd, upward flaring silk drape on the upper brim, pointed at the front and finished with needlework. A little chiffon rose is posed against it. One expects the wide brim to be droopy and many of

ingenious management of materials and new tricks in decoration. They find pretty furbelows and finishing touches in ribbons and flowers or in embroidery and other needlework on simply designed dresses of delicate materials.

Voile and crepe de chine in pastel colors or pale tints stand at the head of the list of dainty materials approved for party frocks; but georgette crepe, dotted swiss, fine batiste, dimity and taffeta silk bear them company. Net and narrow laces contribute something along with needlework, ribbons and touches of embroidery by way of elaborating the simple designs, but just now fashion looks with greatest favor on decorations of self-material and combinations of two colors in one material for little party frocks. When georgette or chiffon makes the dress, tiny posies, ruchings and puffs are made from the same materials, although they may not be the same in color, and set on in borders or other decorative designs. Plaitings and smocking are popular, also petal trimmings or applique figures in contrasting colors.

Party frocks are usually sleeveless and quite short. Usually they are worn over little slips in the same color. When the choice falls on embroidery as a decoration little flower

All "Prettied Up."

motifs are chosen, usually showing small sprays or wreaths. Handsewing and handwork are at a premium on little children's dress-up clothes. No one begrudges the simple needlework that gives distinction to frocks like that pictured here. The yoke is smocked and hand-run tucks are grouped at each side.

Lesson for July 25

THE PASSOVER

LESSON TEXT—Exodus 12:1-49. GOLDEN TEXT—Christ, our Passover, is sacrificed for us.

PRIMARY TOPIC—The Story of a Feast.

JUNIOR TOPIC—The First Passover Feast.

INTERMEDIATE AND SENIOR TOPIC—A Memorial Feast.

YOUNG PEOPLE AND ADULT TOPIC—The Meaning of the Passover.

I. The Passover Instituted (vv. 1-23).

1. The date (v. 2).

With the institution of the passover came a change in the order of time. The common year was rolling on as usual, but with reference to God's chosen people the order was interrupted and everything was made to date from this event.

2. The lamb set apart (vv. 3-5).

This lamb must be a male without blemish, indicating that it must be both representative and perfect.

3. The lamb was killed by the whole congregation (v. 6).

This shows that it was not for the individual only, but for the entire assembly. The setting apart of the lamb was not sufficient. It must be killed, for "without the shedding of blood there is no remission of sins."

4. The blood of the slain lamb was to be placed upon the side posts and lintels of the door (v. 7). When the destroying angel passed through the land he passed over the houses where the door posts were sprinkled with blood (v. 23). This blood was the evidence that a substitute had been offered for them.

5. Israel feeding upon the lamb (vv. 8-10).

This denotes fellowship. The lamb roasted signified the action of fire in God's judgment at the cross. The head, the legs and purtenance thereof show that in the substitutionary sacrifice the understanding, the walk and all that pertains thereto were involved. This shows that the atonement of Jesus Christ involved His obedience to law as well as His suffering in the stead of His own. The eating of unleavened bread signifies that no sin is connected with or allowed in fellowship with Christ. Leaven signifies corruption (1 Cor. 5:7,8). The Israelites did not put away leaven to be saved from the destroying angel, but being saved because under the shadow of the blood they put away leaven, that is, evil, in order to have fellowship with their Redeemer. The bitter herbs connected with this feast suggest the bitterness of Christ's suffering.

6. They ate the passover ready for action (v. 11).

Their loins were girded, their shoes were on their feet, and a staff in hand. The girding of the loins betokened separation from sin, and preparation and readiness for service. The feet being shod indicated their willingness and readiness to march out of Egypt. The staff in hand indicated their nature as pilgrims leaning upon a support outside of themselves. They were to leave behind them the place of death, and darkness and march to the promised land.

7. The uncircumcised denied participation in the feast (vv. 43-49). Circumcision was typical of regeneration. The significance of the requirement is that only those who have become new creatures by the power of the Cross have a right to sit at the passover feast.

II. The Significance of the Passover (vv. 24-28).

It was a memorial institution, calling to mind the deliverance of the Israelites from Egyptian bondage. This was to be taught to their children from generation to generation when they came into the land.

III. The Awful Judgment (vv. 29, 30).

At midnight the Lord smote all the first-born in the land from the first-born of Pharaoh that sat on his throne unto the first-born of the captive that was in bondage, and all the first-born of cattle. There was death that night in every home throughout Egypt where the blood was not found. A great and awful cry went up from the Egyptians for there was not a house where there was not one dead.

IV. The Great Deliverance (vv. 31-33).

So mighty was this stroke that Pharaoh called for Moses in the night and requested him to be gone with his flocks and herds. The Israelites hastily made ready for their journey. They demanded of the Egyptians jewels of silver and gold and raiment. The word "borrow" in verse 35 means "demand" instead of the sense in which we use it today.

Our Christian Calling

To carry out our good and solemn thoughts and feelings into daily life—this is the great difficulty of our Christian calling.

He Offers Us Strength

Whatever the work to which our Master calls us, He offers us a strength in keeping with our needs.

Be Faithful

Not by sight, but by faith. Endure—endure—be faithful to the end!

Around Orchard

SUMMER PRUNING IS LOGICAL PLAN

Summer pruning, which consists in pinching and disbudding, is the most logical method of directing the growth of trees. When proper attention is given to this practice amputation of branches will be unnecessary and the consequent injury incident to pruning will be eliminated.

The perfection of summer pruning provides for the complete control and disposition of growth without involving any material removal of foliage. When the extreme terminal bud of a growing shoot is removed growth in that direction will be checked without injury to the plant. The vitality of the plant is then distributed properly without being wasted in the production of wood that is to be cut away the following winter. However, rude and careless destruction of summer foliage, like the cutting away of long shoots on a grapevine, will often lead to injury. It is certain that full and perfect maturity depends on a full growth of healthy, matured foliage.

When the terminal bud of a branch is pinched out it not only arrests growth in that direction but induces the development of lateral shoots where a more active extension is needed. Disbudding may also be extended to include any superfluous buds, flowers or shoots at any place on a stem or branch in order to divert sap into those which are stronger and are required to remain either for the production of branches, fruits or flowers of superior quality and size. This must always be done in early stages of growth before the shoot removed has developed to any great extent.

The branches of figs, peaches and vines are usually so full of young shoots and fruit buds in early spring that if all were allowed to remain the result would be a dense thicket of useless branches. Many of such shoots die without further attention from the grower, but any useless growth will be made at the expense of the ripening fruit or the remaining wood.

By keeping in mind the principles of summer pruning the difficulties in proper training of an ornamental hedge will be largely eliminated. It is the pinching back of strong, upright branches that makes a dense hedge, with numerous lateral branches near the ground. Neither California privet or barberry should require much winter pruning after the first year.

Producing Apples of High Color Most Profitable

Apples that are high in color sell themselves readily. Wise apple growers will so handle their orchards that they will produce apples of the highest color. Prof. F. C. Sears, head of the department of pomology at the Massachusetts Agricultural college, recently outlined five methods by which apples with high color can be produced.

"First, keep the tree open enough to let in sufficient light. Second, space the trees widely enough in the orchard so that they may get plenty of light; or if fillers have been used, remove them before they crowd so much as to give poor color. Third, use fertilizers more carefully so as to obtain the proper degree of growth for good color without too much foliage. Fourth, adapt our varieties to our soils in order to get the best color. One soil will give highly colored Baldwins, but poorly colored fruit of some other variety. Fifth, thin the fruit."

"Color is chiefly dependent on maturity and sunlight. To get good color, maturity should be hastened by avoiding the use of undue amounts of nitrogenous fertilizers, by sod culture where practicable, by stopping cultivation early, and by using large-growing cover crops. Utilizing sunlight to the best advantage involves pruning to open up the tree and thinning to expose surface to the sun."

Control Currant Aphids by Use of Spray or Dust

Currant aphids, while not generally a serious pest, may be readily controlled should they become troublesome, by the use of spray or dust mixtures containing the necessary quantity of nicotine, the fumes of which are toxic to insects of this sort. Often one application will suffice.

Liquid sprays containing one pint of nicotine sulphate to 100 gallons of spray mixture and dust preparations carrying from 1 to 2 per cent nicotine proved about equally effective against currant aphids in spray tests.

A safe and efficient spray mixture is recommended as follows: Nicotine sulphate, one pint; soap, five pounds, and water, 100 gallons. This should be applied under high pressure and should wet all the surfaces of the foliage thoroughly for best results.

Plan Complete Garden

No garden is complete without a permanent bed of multiplier onions, asparagus, rhubarb, strawberries, red and black raspberries, gooseberries, and currants. The strawberries should be of at least three different varieties: early, late and the everbearing, which give you an abundance of fruit until frost comes. Also have some small fruit trees, such as cherries, peaches, plums, pears, and grapes. Also nut trees such as black walnut and Japanese walnut.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Hannibal

A LITTLE boy, nine years old, stood before a reeking heathen altar one day in 238 B. C. and, at his father's dictation, swore a solemn oath—an oath that was destined to change the fortunes of the world and to cost a half million lives.

The boy was Hannibal, one of the greatest military geniuses of history. His father, Hamilcar, was a famous Carthaginian general. His three fierce sons were known as "the Lion's Brood." Carthage, a sovereign city, whose domains extended for hundreds of miles, was situated on the north coast of Africa, near modern Tunis. It was settled by Phoenicians and rose to pre-eminent commercial and educational greatness. In 246 B. C. Carthage clashed with Rome over the possession of Sicily. This is known as the First Punic or (Phoenician) war. Rome won.

Hamilcar made his nine-year-old son, Hannibal, swear eternal enmity to Rome; then took him on a campaign against Spain. The boy grew up in camps and, at the age of twenty-six, was made commander-in-chief of the Carthaginian armies. His first act of power was to set about fulfilling his childish oath. With this in view he completed the conquest of Spain, meaning to use that country as a base of supplies in his proposed war with Rome.

He then picked a quarrel with Rome's allies at Saguntum and stormed their city. This brought forth a prompt protest from the Romans, and in 219 B. C. the Second Punic war was on. The next spring Hannibal crossed the Pyrenees with 112,000 men and 37 war elephants, sweeping all hostile tribes before him like chaff. Before reaching what is now France, on his march to Italy, Hannibal weeded out his ranks, sending back all except the bravest, hardest men. This cut down his former vast army to less than 30,000. But he knew that in such a campaign as he planned it was quality, not quantity, that counted. He crossed the Rhone, eluding the Roman army sent to stop him, and reached the Alps. The passage of this range of mountains involved tremendous work. The track was impassable for his elephants, and the snows and bitter cold chilled his Africans and Spaniards to the bone. He cleared a road, blasting rocks, it is said, with a preparation of vinegar, and transported his whole army over into northern Italy in 15 days.

Publius Scipio, the Roman consul, again barred his way, but was badly beaten in a battle near Vercelli. At this conflict the consul's seventeen-year-old son, later known to history as "Scipio Africanus," fought his first battle. The Romans, reinforced to 40,000, again attacked Hannibal and again were beaten. The Carthaginian, in the spring of 217 B. C., lured a great Roman army into a trap in a mountain defile near Lake Trasimene and mastered them. Rome, aghast at the invader's progress, chose Fabius Maximus, nicknamed "the Delayer," for general-in-chief. Fabius would risk no general engagement with his terrible foe, but pursued a course of masterly inactivity that has since become known in warfare as "Fabian tactics."

After wasting northern Italy Hannibal the following spring encountered a Roman army 80,000 strong (far larger than his own) near Cannae and literally cut it to pieces. Onward towards the city of Rome itself Hannibal advanced. None dared to oppose him. He held Rome and all Italy in the hollow of his hand. The road to Rome was clear. But, instead of continuing to the city itself, he foolishly went into winter quarters at Capua. When spring came, Hannibal's great chance was gone. Rome was ready for him. His once invincible army was now a dissolute, overfed horde.

True, for years later he ravaged Italy, once encamping within three miles of Rome and sending his skirmishing parties up to the very gates of the city. But never again did he succeed in placing the enemy wholly at his mercy. His star was on the decline. Yet even then no Roman general dared attack him, for in all his 15 years of invasion he was never personally defeated in battle. The younger Scipio hit on a plan to rid Italy of the terrible foe. He crossed with an army into Carthaginian territory, thus carrying the war into Africa. Carthage, being menaced, sent in haste for Hannibal to protect his home city, and he left Italy never to return. Hannibal, with an inferior force, met Scipio at Zama, Africa, and for the first time in his life was beaten. This defeat ended the Second Punic war. Carthage was, for the time, crushed.

Hannibal turned his attention to statesmanship, with such success that within a very few years he had built up Carthage's shattered finances and power. Rome, still dreading him, demanded his surrender. Sooner than involve his country in another war Hannibal voluntarily went into exile. But wherever he went Rome's hatred pursued him.

At last, brought to bay and knowing what treatment he might expect from the relentless Romans, Hannibal sucked poison from a ring he always wore, and once more baffled his life-long foes by dying before they could capture him.

The Old Line

Young Flapper Girls were different in your days, weren't they, grandpa?
"Well, we told 'em so."—London Answers.

Filipinos Hold Firmly to Belief in Witches

Witchery still continues as a source of trouble in the Philippines, and hardly a week passes that the constabulary does not investigate the beating or killing of some person suspected of being a witch.

The Filipino witch, as Charles F. Freeman in the New York Tribune explains, is thought to possess the power to take on the shape of a beast at will and to work evil at a long distance. According to the strength of his magic he can cause a selected victim to become seriously ill or to die, and a credulous native, suffering from some malady which he does not understand, believes he has been bewitched.

Sometimes a witch doctor, exasperated by bad luck, will designate a man or woman as being the guilty "man-kulam," and the innocent suspect falls a victim to mob violence.

Unbreakable Ax

With head and handle of steel, forged and tempered in one piece, a handy new ax is by its very construction, unbreakable, says the Popular Science Monthly. The handle cannot work loose and come out, so there is no danger of the head's flying off. A hand-hold of leather gives a firm grip, and the head does not come in touch with the cold steel. This steel ax is said to be lighter in weight than the usual wooden-handled ax.

Two unusual features of this sturdy ax are a hook on the head that is useful for drawing out staples, and a claw at the end of the handle for pulling nails. Its head, of course, can be used for hammering.

Cautious Youth

A rather stout man was having difficulties under his car when he looked out and saw a boy sitting on the fence. "What are you doing there?" he asked. "I was just watchin'," replied the boy. "And if—"
"And if what?"
"And if I could run faster, I'd laugh."

IN THE LEAD

Fisher's engineering experts—skilled beyond their calling by virtue of years of continuous research and experimentation with all types of body construction—unhesitatingly aver that none but Body by Fisher—exclusively used by General Motors for Cadillac, Buick, Chevrolet, Oakland, Oldsmobile and Pontiac cars—affords the essential virtues of safety, beauty and com-

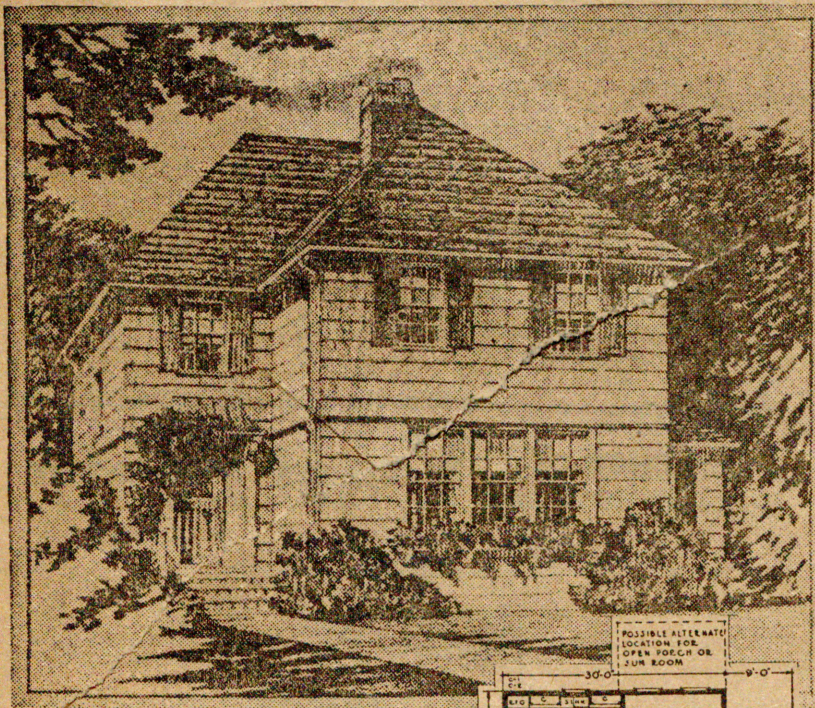

fort which characterize every Fisher product. Quite logically the public knows that when any improvement which really gives an enhanced measure of safety, comfort and luxury is perfected, Fisher will be the first to present it just as Fisher has created and been the first to present every important improvement in body design and construction of the past decade.

FISHER BODIES

GENERAL MOTORS

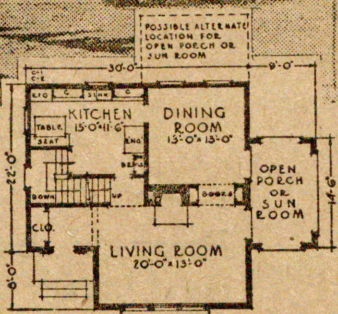

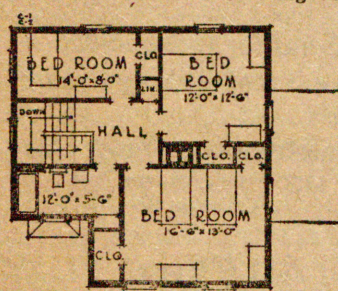

This Thrifty Home Brings Joy to the Rent-Weary

FOR THE family of four or five there is this attractive two-story, six-room house of beveled siding and slate or shingle roof.

One of the interesting features of this house is that every room has a double exposure, while the living room has three sides exposed. Extra windows not shown in the plan may at slight expense be added at either end of the living room. While

this type of house affords the utmost in light and cross-ventilation, it would be well to protect it against the extremes of cold and heat by insulation with celotex for the walls and roof. Such insulation will also cut down outside noises to a marked degree, as in addition to its insulating property, celotex is an efficient sound deadener. The living room has the much desired open fireplace and cleverly arranged bookshelves flanking the entrance to the dining room. The sun porch may be put either to the side or the back of the house, according to the builders' wishes or to conform to the demands of the lot.

Rotarex Electric Clothes washer

The new washing principle of the ROTAREX new type, aluminum cylinder washes clothes clean with out wear. This remarkable new development in the art of laundering combines first, the suction action of vacuum washers; second, the effect of the rocker motion that prevent winding of the clothes, and third, the alternate lifting and dousing that reproduces perfectly the hand method of washing with out rubbing recommended by every maker of fine fabrics.

In the big, ten pound aluminum ROTAREX cylinder the clothes glide without friction over a glassy surface that is free from perforations. The cleansing suds are suctioned into the self-reversing, revolving cylinder through numerous holes in its two ENDS or HEADS. It is the only washer made that does not wash back into the clothes the same dirt that is washed out of them.

Built to do Ten Thousand Washings

Softens Water
as You use it

Without Acids or Chemicals

In the Stover Water Softener is a wonderful mineral bed that removes all hardness from the water that flows through it. Nothing else is removed. The same pure, clean, clear, odorless water that you drink flows in hard and comes out soft. No motor or pump is required. You do away with the dirty, expensive cistern with its health-endangering and mosquito-breeding water.

The Stover Softener takes up no more space in your basement than a hot water tank—requires almost no attention, as there are no mechanical working parts, and costs less to install than cistern and pump.

Come in and let us demonstrate the modern method of supplying homes with the softest water at a turn of a faucet in laundry—bathroom and kitchen.

STOVER WATER SOFTENER

Learning One's Self

Find out what your temptations are and you will find out largely what you are yourself.—Henry Ward Beecher.

Joe Tankins

Joe Tankins says he never could figure that "daylight saving" compensated for the loss of time by people in a railroad station who were trying to find out exactly when a train left.

Happiness

Half the world is on the wrong scent in the pursuit of happiness. They think it consists in having and getting and in being served by others. It consists in giving and in serving others.—Henry Drummond.

Buy across the Counter

WHEN you buy across the counter in the stores of this town, you are using good business judgment. Why? There are many reasons, but one of the most important is this:

You can buy what you want at the price you wish to pay! You are not obliged to accept "something just as good," because you are in a position to compare values and make your own selections.

When you trade at home you are helping your friends to help you! And there is no finer thing in life than neighborly co-operation. It always pays—in happiness and satisfaction as well as dollars and cents.

and save yourself money by trading at home

TINLEY PARK

Edward Goessel has been appointed as one of the drivers of the new chemical truck.

Ollie, Joe and George have built a summer cottage on the shores of Linden Lake. The cottage has electric lights and is just too cute for words. An electric light is to be strung from the shore to the center of the lake so boating parties can use the limpid waters at night.

A number of Tinley Park men interested in sports have been at the Homewood races. They are also getting passes to attend the dog races of the Illinois Kennel Club at Harvey.

Val. H. Scheer has been given the contract to furnish the concrete building blocks for six new houses in the McIntosh sub division at Midlothian.

Tinley is having a building boom this summer, 12 new houses to be erected according to plans. The new houses of Edward Mohr and Selby Hirsch are well under way, and the home of Mr. Hays is now nearing completion.

Members of the German M. E. church have been attending the camp meeting at Berger Station. No church services will be held Sunday at the Tinley Park German M. E. church so as to give members of the congregation a chance to attend the camp meeting.

MOKENA

Last Thursday night the Brotherhood of the St. John Evangelical church of Mokena held a banquet in the church parlors, the occasion being the celebration of the recent membership drive. The "Reds" were the winning team and were feted by the "Blues". A very delightful time was had. Covers were laid for 140 guests. A fine program was given following the banquet.

Special musical numbers were on the program and were much enjoyed as also were the good addresses by various speakers. Truly this was a gathering long to be remembered.

NEW LENOX

The Boy Scouts returned Thursday afternoon from a two weeks camping trip at Rock Creek.

J.C. Urch and niece, Miss Rilla Fellows, are enjoying a vacation in Portsmouth, New Hampshire, the childhood home of Mr. Urch.

New Lenox now has gas. The meters of a large number have been connected.

AMERICAN YOUTH CANDIDATE

Miss Helen F. Dodge of Pennsylvania, holder of a Carnegie medal for heroism, has been nominated as a candidate for the American Youth Award established by the directors of the Sesqui-Centennial International Exposition, which is to be held in Philadelphia from June 1 to December 1 in celebration of 150 years of American Independence. Miss Dodge, the daughter of George H. Dodge of 5944 Walton avenue, Philadelphia, jumped into the Toms River at Ocean Gate, N. J., fully dressed, and, while having use of only one arm, saved the life of a drowning girl.

Every Drop Needed.
Spilled milk of human kindness is the only kind worth crying over.
